Agrément Certificate 02/H070 Product Sheet 3

# WAVIN TWINWALL HIGHWAY DRAINAGE SYSTEM

## WAVIN TWINWALL JUNCTIONS, BENDS AND REDUCERS

This Certificate is issued under the Highway Authorities' Product Approval Scheme (HAPAS) by the British Board of Agrément (BBA) in conjunction with the Highways Agency (HA) (acting on behalf of the overseeing organisations of the Department for Transport; the Scottish Executive; the Welsh Assembly Government; the Department for Regional Development, Northern Ireland), the County Surveyors' Society, the Local Government Technical Advisers' Group, and industry bodies. HAPAS Agrément Certificates are normally each subject to a review every five years.

#### PRODUCT SCOPE AND SUMMARY OF CERTIFICATE

This Certificate relates to Wavin TwinWall Junctions, Bends and Reducers for use in surface water drainage. The fittings are for use in highway drainage with the pipes described in Product Sheets 1 and 2 for the collection and disposal of surface and sub-surface water.

#### AGRÉMENT CERTIFICATION INCLUDES:

- factors relating to compliance with HAPAS requirements
- factors relating to compliance with Regulations where applicable
- independently verified technical specification
- assessment criteria and technical investigations
- design considerations
- installation guidance
- regular surveillance of production
- formal five-yearly review.

#### KEY FACTORS ASSESSED

Strength - the fittings have adequate strength to resist loads associated with installation and subsequent use (see section 5).Performance of the joints - the joints constructed from fittings and pipes with rubber seals remain watertight when subjected to deflection and distortion (see section 6).

Flow characteristics - loss coefficients of fittings have been evaluated (see section 7).

Durability — the material from which the fittings are manufactured will not significantly deteriorate and the anticipated life of the products will be in excess of 50 years (see section 9).

The BBA has awarded this Agrément Certificate to the company named above for the system described herein. This system has been assessed by the BBA as being fit for its intended use provided it is installed, used and maintained as set out in this Certificate.

On behalf of the British Board of Agrément

BCChamluhain

Date of First issue: 19 October 2009

Originally crtificated on 10 July 2002

Brian Chamberlain Head of Approvals — Engineering

JA Coeper

Greg Cooper Chief Executive

The BBA is a UKAS accredited certification body — Number 113. The schedule of the current scope of accreditation for product certification is available in pdf format via the UKAS link on the BBA website at www.bbacerts.co.uk

Readers are advised to check the validity of this Agrément Certificate by either referring to the BBA's website (www.bbacerts.co.uk) or contacting the BBA direct.

# **HAPAS** Requirements

#### **Requirements**

The general requirements for drains are contained in the Manual of Contract Documents for Highway Works (MCHW), Volume 1.

 The MCHW is operated by the Overseeing Organisations: The Highways Agency (HA), the Scottish Executive, the Welsh Assembly Government and The Department for Regional Development (Northern Ireland).

The general requirements for structural wall pipes and fittings are contained in the MCHWs, Volume 1, Clause 518.

Further information and guidance is given in MCHW, Volume 2 and Volume 3 (Drawing Numbers F1 and F2).

Additional site requirements may be included on particular contracts.

# Regulations

#### Construction (Design and Management) Regulations 2007

#### Construction (Design and Management) Regulations (Northern Ireland) 2007

Information in this Certificate may assist the client, CDM co-ordinator or planning supervisor, designer and contractors to address their obligations under these Regulations.

See section: 1 Description (1.3), 2 Delivery and site handling (2.1), 3 General of the Design Considerations part and 10 General of the Installation part.

## General

This Certificate relates to Wavin TwinWall Junctions, Bends and Reducers which are for use in highway drainage with the pipes described in Product Sheets 1 and 2 for the collection and disposal of surface and sub-surface water.

# **Technical Specification**

#### **1** Description

1.1 Wavin TwinWall Junctions, Bends and Reducers are manufactured from material with the specifications given in Table 1.

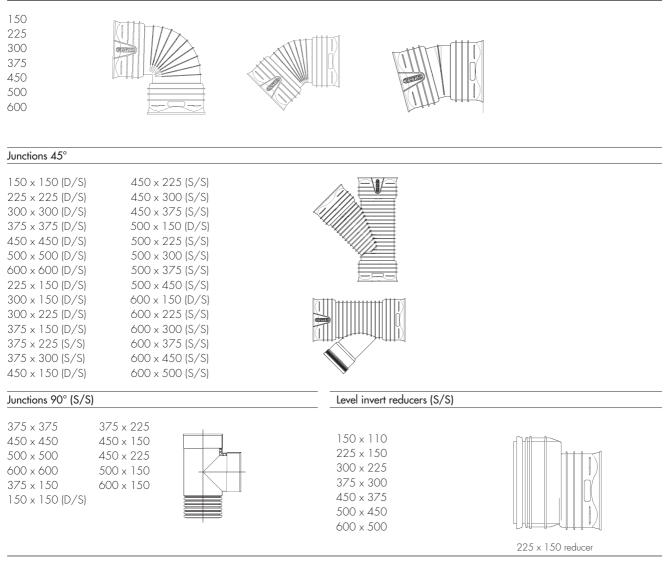

Property	Test method reference	Specification
Tensile properties	BS EN ISO 527-1 : 1996	Sample 1B at 50 mm min <sup>-1</sup> ≥ 21 MPa
Oxygen induction time	BS EN 728 : 1997	≥ 8 min
Melt flow rate	BS EN ISO 1133 : 2005	≤ 8.5 g (10 min) <sup>-</sup>
Density	ISO 1183-3 : 1999	≥ 850 kgm <sup>-3</sup>
Heat reversion	ISO 12091 : 1995	N/A
Effects of heating (injection moulded fittings only)	BS EN ISO 580 : 2005	N/A

(1) This table is in the format of Appendix 5/7 of MCHW, Volume 2. It is used to satisfy Clause 518.2 of MCHW, Volume 1.

(2) This covers, 150 mm, 225 mm, 300 mm, 375 mm, 450 mm, 500 mm and 600 mm (injection moulded), and 375 mm, 450 mm, 500 mm and 600 mm fittings (fabricated).

1.2 Details and dimensions of the fittings are given in Table 2.

#### Bends 88.5° (150 mm - 300 mm); 90° (375 mm - 600 mm); 45°, 30° and 15° (D/S)

1.3 The ring seals described in Product Sheets 1 and 2 are available for each size of pipe for connection to the fittings.

1.4 Continuous quality control is exercised during manufacture. Checks include:

- dimensional accuracy
- airtightness
- visual examination.

1.5 Fittings carry a label bearing the BBA identification mark incorporating the number of this Certificate, and the angle of the bends and junctions, and for fittings greater than 375 mm nominal diameter the legend 'Handle with Care' where applicable.

## 2 Delivery and site handling

2.1 Handling, storage and transportation should be in accordance with MCHW and the manufacturer's instructions.

2.2 When long-term storage is envisaged, Wavin TwinWall Junctions, Bends and Reducers must be protected from direct sunlight. If protection cannot be provided, consideration must be given to the effects of daily exposure to direct sunlight:

- up to 3 months negligible UV degradation but possible extreme surface temperatures of up to 80°C may cause some localised distortion
- 3 to 12 months may have significant effect on the impact resistance and physical properties
- over 12 months damage will occur unless protection provided.
- 2.3 Fittings above 375 mm nominal diameter must be handled with care.

# Assessment and Technical Investigations

The following is a summary of the assessment and technical investigations carried out on Wavin TwinWall Junctions, Bends and Reducers.

# Design Considerations

### 3 General

Wavin TwinWall Junctions, Bends and Reducers, when used with the pipes described in Product Sheets 1 and 2, comply with the requirements of the MCHW, Volume 1, Clause 518.3 for pipe, Clause 518.6 for couplers and Clause 518.7 for the system. When installed in accordance with the recommendations given in the Certificate they are suitable for use in highways for the collection and disposal of surface and sub-surface water.

## 4 Practicability of installation

The product is designed to be installed by a competent contractor, experienced with this type of product.

### 5 Strength

The fittings have adequate strength to resist loads associated with installation and with subsequent use in the situations described in this Product Sheet.

### 6 Performance of joints

The joints constructed from fittings and pipes with rubber seals comply with watertight joints in accordance with MCHW, Volume 1, sub-clause 504.3.

### 7 Flow characteristics

When used with the pipes described in Product Sheets 1 and 2, the fittings will increase the hydraulic resistance of the system. Loss coefficients (K values) may be taken as:

15° bends	0.2
30° and 45° bend	0.5
45° branch connections	1.0

### 8 Maintenance

Drains incorporating the fittings can be rodded easily using conventional drain rods. In common with other standard plastics drainage systems, toothed root cutters and rods with metal ferrules, as used with some mechanical cleaning systems, could damage the fittings and should not be used.

### 9 Durability

In the opinion of the BBA, when used in the context of this Certificate, the material from which the fittings are manufactured will not significantly deteriorate and the anticipated life of the products will be in excess of 50 years.

# Installation

## 10 General

Drains utilising the Wavin TwinWall Junctions, Bends and Reducers must be installed in accordance with MCHW, Volume 1, Clauses 503, 505, 518.7 and 518.8.

### 11 Procedure

11.1 For typical laying, trench and backfilling specification details, see section 13 of Product Sheets 1 and 2.

11.2 To make a joint a ring seal is fitted externally to the first corrugation in the pipe. The inside of the coupler is lubricated and the pipe pushed fully home to the central register.

11.3 Pipes and fittings must be protected from site construction traffic.

### 12 Tests

Tests were carried out to determine:

- dimensional accuracy to ISO 11922-1 : 1997 and ISO 11922-2 : 1997
- impact resistance (drop test) to BS EN 12061 : 1999
- ring stiffness to ISO 13967 : 1998
- rodding resistance to sub-clause 518.12
- watertightness of fabricated fittings to EN 1053 : 1995
- flexilibility of fabricated fittings to BS EN 12256 : 1998.

### 13 Investigations

The manufacturing process was examined, including the methods adopted for quality control, and details were obtained of the quality and composition of the materials used.

### 14 Conditions

- 14.1 This Certificate:
- relates only to the product/system that is named and described on the front page
- is granted only to the company, firm or person named on the front page no other company, firm or person may hold or claim any entitlement to this Certificate
- is valid only within the UK
- has to be read, considered and used as a whole document it may be misleading and will be incomplete to be selective
- is copyright of the BBA
- is subject to English law.

14.2 Publications and documents referred to in this Certificate are those that the BBA deems to be relevant at the date of issue or re-issue of this Certificate and include any: Act of Parliament; Statutory Instrument; Directive; Regulation; British, European or International Standard; Code of Practice; manufacturers' instructions; or any other publication or document similar or related to the aforementioned.

14.3 This Certificate will remain valid for an unlimited period provided that the product/system and the manufacture and/or fabrication including all related and relevant processes thereof:

- are maintained at or above the levels which have been assessed and found to be satisfactory by the BBA
- continue to be checked as and when deemed appropriate by the BBA under arrangements that it will determine
- are reviewed by the BBA as and when it considers appropriate
- remain in accordance with the requirements of Highways Authorities' Product Approval Scheme.

16.4 In granting this Certificate, the BBA is not responsible for:

- the presence or absence of any patent, intellectual property or similar rights subsisting in the product/system or any other product/system
- the right of the Certificate holder to manufacture, supply, install, maintain or market the product/system
- individual installations of the product/system, including the nature, design, methods and workmanship of or related to the installation
- the actual works in which the product/system is installed, used and maintained, including the nature, design, methods and workmanship of such works.

14.5 Any information relating to the manufacture, supply, installation, use and maintenance of this product/system which is contained or referred to in this Certificate is the minimum required to be met when the product/system is manufactured, supplied, installed, used and maintained. It does not purport in any way to restate the requirements of the Health & Safety at Work etc Act 1974, or of any other statutory, common law or other duty which may exist at the date of this Certificate; nor is conformity with such information to be taken as satisfying the requirements of the 1974 Act or of any statutory, common law or other duty of care. In granting this Certificate, the BBA does not accept responsibility to any person or body for any loss or damage, including personal injury, arising as a direct or indirect result of the manufacture, supply, installation, use and maintenance of this product/system.
